## Ammisione al progetto WTTM

Nel comunicato stampa del 5 gennaio 2024, Vantea SMART, Società di Information Technology e PMI innovativa quotata su Euronext Growth Milan, comunica di essere rientrata per il progetto “WTTM” all’interno della graduatoria relativa al Programma della Regione Abruzzo FESR 2021 - 2027 - *Intervento 1.1.1.1: Sostegno a progetti di Ricerca e innovazione delle imprese afferenti ai Domini tecnologici della Strategia Regionale di Specializzazione Intelligente RIS3 Abruzzo 21 – 27.* La Società, in collaborazione con l’advisor Ramses Group di Pescara, ha presentato il proprio progetto, in data 27 settembre 2023 per un importo complessivo di circa € 0,80 mln e una durata di 18 mesi, e ha ricevuto un contributo a fondo perduto di € 0,56 mln.

Il progetto Welcome To The Machine (WTTM) riguarda il disegno e la sperimentazione di un *framework di cybersecurity* per le aziende attive nel settore *automotive*, e prevede, nel dettaglio:

- la proposizione di uno standard, sulla base dell’esperienza fatta sul NIST (National Institute of Standards Technology);
- il disegno di una piattaforma software per definire la *cybersecurity transformation* nel settore *automotive*, similmente all’esperienza del settore *finance* nell’ultimo decennio;
- il disegno di un V-SOC (Vehicle Security Operation Center), finalizzato al monitoraggio *live* degli autoveicoli, alla prevenzione ed alla gestione degli incidenti *cyber*.

Simone Veglioni, CEO della Società, ha commentato positivamente l’operazione: “Questo finanziamento, unito a quello del MIMIT, ci dà la definitiva conferma della correttezza della strategia adottata nel corso dell’anno precedente, che ha visto l’azienda penalizzare gli investimenti nei settori esterni all’IT per favorire quelli sulla cybersecurity. I riscontri che stiamo ottenendo dalle istituzioni e dal mercato ci inducono a continuare decisamente su questa strada per portare l’azienda ad affermarsi, nel medio periodo, come società di servizi cyber e di prodotti cyber. I prodotti in corso di realizzazione, oltre ad incrementare il valore dell’azienda, apportano contributi reddituali diretti e indiretti. La vendita di licenza, infatti favorisce anche la crescita dei servizi e, soprattutto, dei suoi margini. Il progetto WTTM, in particolare, rappresenta per noi un punto di svolta: anni fa abbiamo deciso di non investire su un SOC (Security Operation Center) perché ritenevamo l’investimento troppo rischioso per la tipologia dei nostri clienti e per la presenza di una concorrenza già folta; oggi invece riteniamo estremamente corretto investire su un Vehicle-SOC, perché non vediamo concorrenza e andiamo verso un mercato che nei prossimi 5-10 anni avrà un miliardo di veicoli connessi.”

Tale comunicato rafforza la nostra view positiva sulla Società, dunque confermiamo le nostre stime: **rating BUY, Target Price € 3,00, risk MEDIUM.**

*The BUY, HOLD and SELL ratings are based on the expected total return (ETR – absolute performance in the 12 months following the publication of the analysis, including the ordinary dividend paid by the company), and the risk associated to the share analyzed. The degree of risk is based on the liquidity and volatility of the share, and on the rating provided by the analyst and contained in the report. For financial securities (banks and insurance companies) Integrale SIM SpA tends to use methods based on comparison of the ROE and the cost of capital (embedded value for insurance companies).*
